Automated Phone System Survey

At Westside Family Dentistry, we have implemented a new automated phone system, Televox, which reminds patients of their upcoming appointments 2 days in advance. Televox allows patients to confirm their appointments by pressing the 1 button on the phone. The staff and doctors at Westside Family Dentistry value our patients' opinions, so we are asking you how you would rate the new Televox system.

- Televox has made confirming appointments easy and efficient.
- Televox has mad confirming difficult and inconvenient.
